

TRANSPORTATION CHOICES SUMMIT

It's time for California to have *real* transportation choices: safe, abundant options for walking, biking, and public transportation. Our economy, environment, and quality of life ride on it! Diverse organizations and advocates are speaking out locally for transportation choices. We need State investments and policies to help us achieve our common vision.

Let's come together to learn, develop common strategies and send a powerful message: California *must* support a transportation system and model for growth that is sustainable and equitable. Please, join us.

STEERING COMMITTEE

- American Lung Association in California
- California Bicycle Coalition
- California Council for the Blind
- California League of Conservation Voters
- California Pan Ethnic Health Network
- California Transit Association
- ClimatePlan
- Move LA
