

TRANSPORTATION \* EQUITY \* CLIMATE \* Transportation \* Equity \* Climate \* Transportation \* Equity

For nearly two decades, TransForm has been building a movement to help more Californians live in affordable, walkable neighborhoods with great transportation choices.

In 2016, we'll continue leading this movement to keep our state affordable, connect more people to opportunity, and help solve our climate crisis.

**Read on to learn about our priorities for 2016, and how you can get involved.**

Transportation \* **EQUITY** \* Climate \* Transportation \* Equity

## **New ideas need to include everyone.**

**Launch our Shared Mobility for All initiative in Oakland and San Francisco.** Work with public and private partners to ensure the benefits of bikeshare, carshare, and transit apps are extended to low-income communities.

**Continue our pioneering urban Safe Routes to School program** in 160 schools throughout Alameda County, where the majority of students are low-income.

**Reframe dialogue on transportation, climate, and equity with our Climate Benefits for California campaign.** Tell the story of how cap-and-trade investments are improving people's lives, especially in communities historically left out of health and prosperity.

**Push for a state Transportation Equity Package.** With key partners, propose a set of bills that starts to reshape state transportation policy to make up for years of underinvestment in low-income communities.

**You can't get ahead if you can't get around.**

**Ensure Bus Rapid Transit (BRT) supports community needs.**

Work with partners and officials in East Oakland and Silicon Valley to ensure BRT projects fulfill the promise of dramatic mobility improvements and investment serving low-income communities.

**Shift Bay Area express lane planning away from highway expansion.**

Advocate for Santa Clara, San Francisco, and San Mateo counties to convert existing lanes instead of building new ones, use revenues for public transit, and start an equity program.

**Influence key 2016 funding measures to strengthen Bay Area public transportation.**

Help pass a ballot measure to repair BART's core system, and shape efforts to improve transportation choices in Santa Clara and Contra Costa counties and at AC Transit.

**Win more state funding for public transportation, walking, and biking.**

Press the Legislature to invest an additional \$100 million into the Active Transportation Program and increase funding for public transportation by at least \$400 million.

**Affordable homes near transit cut climate pollution.**

**Launch GreenTRIP Connect:** a powerful, free online tool that will help communities throughout California build more homes near transit by calculating the climate, financial, and community benefits of strategies to reduce driving and increase affordability.

**Certify 15 new GreenTRIP residential developments in the Bay Area.**

GreenTRIP Certification helps shape innovative developments that include strategies to reduce driving and pollution, while saving money for residents and developers alike.

**Help affordable housing near transit win state funding.** Through consulting and advocacy, support a pipeline of great proposals for Affordable Housing and Sustainable Communities funding.

**Ensure the state's climate program continues to invest heavily in sustainable communities.** Co-lead the Sustainable Communities for All Coalition in advocating for affordable housing near public transportation as a key climate strategy.
